Accelerators, Beam Handling and Targets

Proceedings of the International Workshop on High Energy Photon Colliders
DESY, Hamburg, Germany, June 14–17, 2000

Plenary Session

Introduction: goals of the workshop GG2000, V. Telnov 472 (2001) 1

$\gamma\gamma$ Collider, T. Takahashi 472 (2001) 4

Higgs, SUSY and the standard model at $\gamma\gamma$ colliders, K. Hagiwara 472 (2001) 12

Top quarks at photon colliders, E. Boos 472 (2001) 22

QCD at photon colliders, J. Kwieciński 472 (2001) 30

New physics beyond the standard model at $\gamma\gamma$ colliders, T.G. Rizzo 472 (2001) 37

Photon collider at TESLA, V. Telnov 472 (2001) 43

The NLC photon collider option progress and plans, J. Gronberg 472 (2001) 61

Multi-TeV CLIC photon collider option, H. Burkhardt 472 (2001) 67

TESLA*HERA based γp and γA colliders, A.K. Çiftçi, S. Sultansoy and Ö. Yavaş 472 (2001) 72

A laser system for the TESLA photon collider based on an external ring resonator, I. Will, T. Quast, H. Redlin and W. Sandner 472 (2001) 79

Femtosecond laser technologies for linear collider designs, K. Kobayashi and A. Endo 472 (2001) 86

FEL system for gamma–gamma collider at TESLA, E.L. Saldin, E.A. Schneidmiller and M.V. Yurkov 472 (2001) 94

Summary Session

Gold-plated processes at photon colliders, E. Boos, A. De Roeck, I.F. Ginzburg, K. Hagiwara, R.D. Heuer, G. Jikia, J. Kwiecinski, D.J. Miller, T. Takahashi, V.I. Telnov, T. Rizzo, I. Watanabe and P.M. Zerwas 472 (2001) 100

Physics Session

Standard Model, Higgs, SUSY

Why photon colliders are necessary in a future collider program, I.F. Ginzburg 472 (2001) 121

Precision Higgs physics at a $\gamma\gamma$ collider, M. Melles 472 (2001) 128

PII: S0168-9002(01)02001-0

Light Higgs production at a photon collider, S. Söldner-Rembold and G. Jikia 472 (2001) 133

Production of MSSM Higgs bosons in $\gamma\gamma$ collisions, M.M. Muhlleitner 472 (2001) 139

Distinguishing between MSSM and NMSSM with $e\gamma$ scattering, C. Blöchinger, F. Franke and H. Fraas 472 (2001) 144

Potential of Photon Collider in resolving SM-like scenarios, I.F. Ginzburg, M. Krawczyk and P. Osland 472 (2001) 149

Heavy quark pair production background to the Higgs signal in linearly polarized photon–photon collisions, G. Jikia and A. Tkabladze 472 (2001) 155

Sfermion production at photon colliders, M. Klasen 472 (2001) 160

Chargino production and decay in photon–photon collisions, T. Mayer and H. Fraas 472 (2001) 165

TESLA: potentials of $\gamma\gamma$ and e^+e^- options in stoponium searches, D.S. Gorbunov, V.A. Ilyin and V.I. Telnov 472 (2001) 171

The processes $\gamma\gamma \to \gamma\gamma$, γZ, ZZ, G.J. Gounaris 472 (2001) 181

Progress towards a $\gamma\gamma \to 4$ leptons Monte Carlo, C. Carimalo, W. Da Silva and F. Kapusta 472 (2001) 185

A polarized τ factory at the Next Linear Collider, S.K. Mtingwa and M. Strikman 472 (2001) 189

Top-quark Physics

Top quark electric dipole and $Z\gamma\gamma$ couplings at a photon collider, P. Poulose 472 (2001) 195

Top quark threshold production in $\gamma\gamma$ collisions: current theoretical issues, A.A. Penin 472 (2001) 201

QCD

$\gamma\gamma$ Cross-sections and $\gamma\gamma$ colliders, R.M. Godbole and G. Pancheri 472 (2001) 205

Charm production at a linear e^+e^- and photon collider and its sensitivity to the gluon content of the photon, P. Jankowski, M. Krawczyk and A. De Roeck 472 (2001) 212

The gluon content of the photon from di-jet production at the $\gamma\gamma$-collider, T. Wengler and A. De Roeck 472 (2001) 217

A model of F_2^γ at arbitrary Q^2 and the total photon–photon cross-sections at high energies, B. Badelek, M. Krawczyk, J. Kwieciński and A.M. Staśto 472 (2001) 222

QCD predictions for the spin-dependent structure function $g_1^\gamma(x, Q^2)$ of the photon in the low x region of $e\gamma$ colliders, J. Kwieciński and B. Ziaja 472 (2001) 229

Beyond Standard Model

Probe physics beyond the SM at $\gamma\gamma$ collider, L. Han, Y. Jiang and W.-G. Ma 472 (2001) 233

Heavy selectron production with exotic signature in R-parity breaking SUSY models at $e\gamma$ colliders, T. Kon . 472 (2001) 239

Leptoquark pair production in $\gamma\gamma$ scattering: threshold resummation, J. Blümlein and A. Kryukov 472 (2001) 243

Leptoquark searches in TESLA, A.F. Żarnecki 472 (2001) 248

Technical Session

On the way to 100 TW–10 Hz titanium–sapphire laser facilities, M.P. Kalachnikov, P.V. Nickles, H. Schönnagel and W. Sandner 472 (2001) 254

Compton effect as a basic process in the conversion region, V.G. Serbo 472 (2001) 260

Nonlinear effects in Compton scattering at photon colliders, M. Galynskii, E. Kuraev, M. Levchuk and V. Telnov 472 (2001) 267

Problems of multi-TeV photon colliders, V. Telnov 472 (2001) 280

Accelerator aspects of photon colliders at TESLA, N.J. Walker 472 (2001) 291

Small horizontal emittance in the TESLA damping ring, W. Decking 472 (2001) 297

Low emittance photoinjectors, M. Ferrario 472 (2001) 303

Feasibility of optical diffraction radiation for a non-invasive low-emittance beam diagnostics, J. Urakawa, H. Hayano, K. Kubo, S. Kuroda, N. Terunuma, M. Kuriki, T. Okugi, T. Naito, S. Araki, A. Potylitsyn, G. Naumenko, P. Karataev, N. Potylitsyna, I. Vnukov, T. Hirose, R. Hamatsu, T. Muto, M. Ikezawa and Y. Shibata 472 (2001) 309

Proceedings of the International Workshop NuFact'00 Muon Storage Ring for a Neutrino Factory Monterey, CA, USA, 22–26 May, 2000

Workshop Summary

NuFact'00 workshop summary, S.G. Wojcicki and J. Wurtele 472 (2001) 323

Plenary talks

Results from Super-Kamiokande and status of K2K, K. Nakamura 472 (2001) 329

Analysis of the Superkamiokande atmospheric neutrino data in the framework of four neutrino mixings, O. Yasuda 472 (2001) 343

Catching some *Z*s: The solar neutrino problem, neutral current interactions, and the Sudbury Neutrino Observatory, T.D. Steiger 472 (2001) 348

The MECO experiment: a search for lepton flavor violation in muonic atoms, J.L. Popp 472 (2001) 354

Overview of grand unified models and their predictions for neutrino oscillations, C.H. Albright 472 (2001) 359

Four-neutrino oscillations and the solar neutrino problem, C. Giunti, M.C. Gonzalez-Garcia and C. Peña-Garay 472 (2001) 364

Dear Santa: heavy flavour physics at neutrino factories—desires from theory, I.I. Bigi 472 (2001) 371

CERN ideas and plans for a neutrino factory, H. Haseroth 472 (2001) 376

A feasibility study of a neutrino source based on a muon storage ring, D. Finley and N. Holtkamp 472 (2001) 388

Working Group 1

Summary

Summary of Working Group I at NuFact'00

Neutrino oscillation physics at a neutrino factory, P. Hernandez 472 (2001) 395

Possibilities at a Neutrino Factory

Summary of golden measurements at a ν-factory, A. Donini, O. Mena and S. Rigolin 472 (2001) 403

Determination of neutrino oscillation parameters at a neutrino factory, K. Whisnant 472 (2001) 408

Testing neutrino properties at long baseline experiments and neutrino factories, S. Pakvasa 472 (2001) 413

Measuring CP violation by low-energy medium-baseline neutrino oscillation experiments, H. Minakata and H. Nunokawa 472 (2001) 421

Working Group 2

Summary

Summary of Working Group 2 at NuFact'00, K. McFarland, M. Mangano and N. Sasao 472 (2001) 427

High Rate Experiments and Rare Processes at a ν Factory

Precise measurement of the Fermi-coupling constant Precise Measurement of μ^+ Lifetime, S.N. Nakamura . . 472 (2001) 429

Neutrino oscillation and CP violation, J. Sato 472 (2001) 434

Searches for neutrino magnetic moments, J. Krane 472 (2001) 440

Status of the solutions to neutrino anomalies based on non-standard neutrino interactions, H. Nunokawa . . . 472 (2001) 443

Working Group 3

Summary

Summary of Working Group 3: interface between machine and physics, J.J. Gomež Cadenas, S. Geer and Y. Mori 472 (2001) 451

Interplay of Accelerators and Detectors

Impact of the muon beam divergence and polarization on the prediction accuracy of the neutrino flux at a distant detector of a neutrino factory, I.M. Papadopoulos 472 (2001) 455

Neutrino tracking calorimetry with plastic scintillator bars, G. Giannini, G. Santin, M. Spinetti, L. Votano and K. Hoepfner 472 (2001) 460

The MONOLITH project, A. Geiser 472 (2001) 464

Working Group 4

Summary

Summary of Working group 4 at NuFact'00: Accelerator Theory, J. Gareyte 472 (2001) 470

Scenarios and Design

Collective effects and final bunch rotation in a 2.2 GeV–44 MHz proton accumulator–compressor for a neutrino factory, R. Cappi, J. Gareyte, E. Métral and D. Möhl 472 (2001) 475

A 3–11 GeV recirculating linac for muon acceleration, C.J. Johnstone and D. Neuffer 472 (2001) 487

A 50-GeV muon storage ring for a neutrino factory at Fermilab, C. Johnstone, D. Finley and N. Holtkamp . 472 (2001) 493

Muon accelerator for the neutrino factory, D. Douglas and V.A. Lebedev 472 (2001) 499

Proton drivers for neutrino factories: The CERN approach, H. Schönauer 472 (2001) 504

A new underground laboratory in the USA for a neutrino factory detector and other scientific projects, D.B. Cline 472 (2001) 511

A high brilliance source for muon colliders, U. Gastaldi 472 (2001) 517

Neutrino-factory storage ring with multiple baselines, D.B. Cline, Y. Fukui and A. Garren 472 (2001) 519

Recirculating linacs for a neutrino factory—Arc optics design and optimization, S.A. Bogacz and V.A. Lebedev 472 (2001) 528

Towards accurate simulation of fringe field effects, M. Berz, B. Erdélyi and K. Makino 472 (2001) 533

Polarization effects in the front end of the neutrino factory, R.C. Fernow, J.C. Gallardo and Y. Fukui 472 (2001) 541

Particle Production

Particle production for a muon storage ring I. Targetry and π/μ yield, N.V. Mokhov 472 (2001) 546

Particle production for a muon storage ring II. Radiation loads, N.V. Mokhov 472 (2001) 552

Pion production at low energies, J. Pasternak, S. Schwenke and J. Collot 472 (2001) 557

Phase Rotation and Cooling

Progress in the linear beam dynamics study of ionization cooling channel, K.-J. Kim and C.-x. Wang 472 (2001) 561

Comparison of alternate solenoid and long solenoid cooling channels, V. Balbekov 472 (2001) 571

Phase rotation channel design with induction linacs, Y. Fukui 472 (2001) 577

Muon capture and acceleration without phase rotation and cooling, K. Hanke 472 (2001) 582

Laser cooling of TeV muons, F. DeJongh 472 (2001) 585

A 40–80 MHz system for phase rotation and cooling, A. Lombardi 472 (2001) 590

Radiation Issues

Beam-induced radiation in a muon storage ring for a neutrino factory, N.V. Mokhov and C.J. Johnstone . . . 472 (2001) 595

The radiation environment in and near high gradient rf cavities, J. Norem, A. Moretti and M. Popovic 472 (2001) 600

Working Group 5

Summary

Summary of Working Group 5 at NuFact'00, M. Tigner 472 (2001) 606

Research & Development Issues

Neutrino factory and muon collider collaboration R&D program, M.S. Zisman 472 (2001) 611

R&D needs for a neutrino factory, E. Keil 472 (2001) 620

Hardware Considerations

Target studies for the neutrino factory at the Rutherford Appleton laboratory, P. Drumm, C. Densham and R. Bennett 472 (2001) 627

Energy absorber R&D, D.M. Kaplan, E.L. Black, K.W. Cassel and M. Cummings 472 (2001) 632

High field, high repetition rate kicker, Y. Ishi, Y. Mori, M. Muto, Y. Shirakabe and A. Takagi 472 (2001) 639

High gradient air core cavity for long bunch, Y. Iwashita 472 (2001) 643

Updated results of the horn study for the Nufact, A.E. Ball, A. Blondel, S. Gilardoni and N. Vassilopoulos . . 472 (2001) 650
